

Background:

The principal of "Future Bright Academy" has asked you, a data science student, The academy is implementing a simple Student Performance Evaluation System that records students' names and their corresponding marks, then assigns a grade based on their scores. The system uses predefined grading criteria:

The system should take input for five students, process their grades accurately, and display their results in a structured format.

- A: 90 - 100
- B: 80 - 89
- C: 70 - 79
- D: 60 - 69
- E: Below 60

The academy administration wants to automate this process and ensure that each student's name, marks, and assigned grade are displayed correctly.
